DeskPRO Build #69 Released

[Deskpro Releases](#) - [تعليقات \(0\)](#) - Chris Padfield - 2012-07-25

.We are pleased to announce a new release of the DeskPRO helpdesk platform, build #69

:The following is an automatically generated list of changes in this release

- Offline message takes precedence over not-built error. Fixes error screen in user interface while new files are being moved into place
- Userchat phrases are raw
- Fix setters on Stat
- Fix html phrases
- Update JS phrase util to auto-escape for consistency with PHP one. Update uses in chat to use raw, as those locations already handle escaping
- Fix viewing error log item always showing first log on invalid usersources 404
- Add getIdFromCode self-contained in SessionEntityStorage

If you are using the cloud version of DeskPRO, your account will have already been updated or will be updated within the next 24-48 hours

.If you are using DeskPRO download, you can update your installation from the admin interface
