

Deskpro Horizon Release 2023.48

Release Announcements - تعليقات (٠) - Lara Proud - 2023-11-28

We're pleased to announce the release of Deskpro Horizon, version 2023.48.1. This release includes an exciting new feature that improves agent efficiency, some general improvements to product functionality, and several bug fixes

New Features

[Build an unbeatable blueprint for support with Ticket Templates](#) 

Configure custom outlines for every core ticketing process with our newest feature [Ticket Templates](#). Agents can apply templates in two clicks with pre-filled fields, boosting agent productivity, reducing human error, and speeding up ticket creation

For more information on how to start using Ticket Templates, please refer to our [Admin Guide](#). For tips on using them as an Agent, check our [Ticket Templates Guide](#)
