Deskpro Horizon Release 2024.22

Deskpro Releases - (١٠) تعليقات - James Godwin - 2024-05-30

We're pleased to announce the release of Deskpro Horizon, version 2024.22.0 This release includes several new .features our team has been developing, general improvements to product functionality, and several bug fixes

New Features

Connect Office 365 email accounts using Deskpro Authentication [] .((SC 111884

We've simplified the process of adding an Office 365 account to manage your help desk's email with our new OAuth provider. Now, you can link your Office 365 email account directly through Deskpro without the need to set up credentials in Microsoft Azure/Entra. This has been streamlined as Deskpro can handle this in only a few

The previous OAuth method will still be available, allowing you the option to continue using the existing setup if .you prefer

Add desired sync time to user sources that support syncing (SC \square .(113505

You can now specify a preferred time for Deskpro to automatically sync with your Active Directory or LDAP sources for both users and agents. When Auto Sync is enabled, the default sync time is set to 1 am UTC, but you .can customize this to better fit your needs

Latest Improvements

We have strengthened security measures for agents accessing inline images in tickets, as well as ticket and file \square .(attachments through the agent interface (SC 137755 & SC 139290

Bug Fixes

We have fixed Brand slugs for On-Premise customers using a custom domain, to prevent users from entering a \Box (redirect loop when visiting branded Help Centers (SC 146600

Corrected an issue with the User CSV import to ensure users are not incorrectly added to the wrong \square .(organization when the organization name contains numbers (SC 150886

We added safeguards to the email reply box to prevent message drafts from remaining after sending a reply \square (and closing the ticket (SC 103135

Fixed the issue with creating tickets using Ticket Templates to ensure agent notes are not sent to users as \square .(messages (SC 149171

For Safari users, we resolved the issue with the ticket reply box so that keyboard commands (e.g., cmd + \leftarrow) do \square (not disrupt the reply box layout (SC 149106

We fixed the total charge footer in the Time & Billing feature on Tickets, so Agents can scroll the full list of \square . (charges on a ticket (SC 147437

On-Premise Controller Release 2.17.2

We are also delighted to announce the latest version of the OPC, 2.17.2. This version includes new features and some general improvements that will provide an increased level of administrator capabilities

Latest Improvements

.(Check and renew the default self-signed HTTP certificate for instances and OPC (SC 152388 [

Create a problem check to alert if Elasticsearch configuration has been replaced due to an upgrade (SC \square .(152562

Bug Fixes

.(Allow the installer script to accept arguments to pass to the OPC initialization routine (SC 152809 \square
