

(Extension of Authentication Options (5.2

Product - (.) تعليقات - Lauren Cumming - 2017-03-13

:We have extended the authentication options available so that you can now

add agents/users to multiple usergroups -

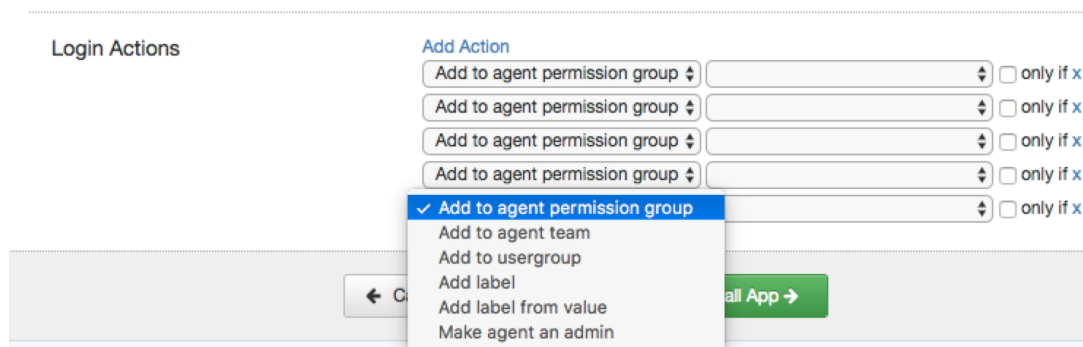

add agents to teams -

add labels to agents -

add labels from value -

make an agent an admin -

You can also now add multiple actions at a time and add filters e.g Add to agent permission group 'only if X

The screenshot shows the 'Login Actions' configuration page. On the left, there's a header 'Login Actions'. To the right, there's a table with columns for 'Add Action', a dropdown menu, and a checkbox for 'only if x'. The first row has 'Add to agent permission group' in the dropdown. A dropdown menu is open for the first row, showing the following options: 'Add to agent permission group' (checked), 'Add to agent team', 'Add to usergroup', 'Add label', 'Add label from value', and 'Make agent an admin'. Below the table, there are navigation buttons: a back arrow, a 'Cancel' button, and a green 'Save App' button.
