

Import Ticket Data Seamlessly with Deskpro's Enhanced CSV Importer

([Product \(Admin\)](#) - [تعليقات \(.\)](#)) - Lara Proud - 2024-01-16

Using our enhanced CSV Importer you can now import existing ticket data from a CSV file directly into Deskpro, in addition to User and Organization data

Once uploaded, you can map data from your file to both pre-defined and custom fields in your Deskpro helpdesk to ensure the Tickets are imported with the information you need

The Ticket Importer currently supports singular agent and user messages per ticket and agent notes. Additionally, you can decide to keep the existing ticket ID (Ref) or have a new ID assigned during import. Some of the other pre-defined fields you can map to during a ticket import include

Reference •

Subject •

Labels •

(User Email (Owner •

Agent •

Agent Team •

And more •

You are also able to define and create custom fields to map your data to during the import to further streamline your data transfer

Replace all values

Update all mapped values

My data has headers

My data does not have headers

Column Name

Example Data

Map To

Subject	Help placing new order	<div>Subject</div> <div>+</div>
User Message	I am looking to purchase a new item	<div>User Message Text</div> <div>+</div>
User Email	bill@example.com	<div>Owner</div> <div>+</div>
Agent Message	Of course, what item is of interested?	<div>Agent Message Text</div> <div>+</div>
Assigned Agent	agent@deskpro.com	<div></div> <div>+</div>
Ticket Date	2024-16-01	<div></div> <div>+</div>
