

Introducing: New Knowledgebase Content Editor

Product - تعليقات (٢) - Benedict Sycamore - 2018-03-19

The knowledgebase content editor used in the Publish section within Deskpro has been updated

We have introduced Froala, a lightweight WYSIWYG HTML Editor written in Javascript that enables even more rich text editing opportunities within Deskpro

?How does the new editor work

Froala works a lot like our old text editor, is incredibly easy to use, and comes with a whole range of useful features that you can check out [here](#)
