!Introducing our new integration with TeamViewer

([Product \(Admin\)](#) - [تعليقات \(٠\)](#) - David Anjonrin-Ohu - 2022-12-06

.We're happy to announce that our latest integration is with the remote access service TeamViewer

Installing this app gives your team the ability to create new TeamViewer sessions while working on a ticket,
saving them from having to leave your Deskpro instance

The app also gives you a list of active sessions with a copy button to make it easy to share details of TeamViewer sessions with your users while communicating with them
