New Feature: Set Up Permissions Faster
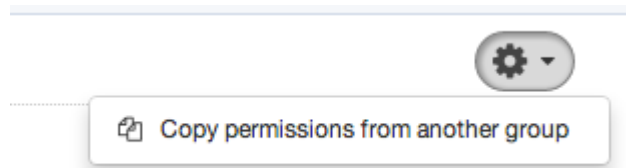

Product - (٠) تعليقات - Ben Henley - 2014-08-28

.DeskPRO's powerful agent permissions system gives you fine-grained control over what agents can do

.Now we've made it easier to set up and manage with two time-saving interface tweaks

.When you're creating a new permission group, you can now copy the settings from an existing group

.You'll also find a new **Toggle All** control to turn a whole column of permissions on or off
