Product - (٠) تعليقات - Ben Henley - 2014-10-02

.We know that a lot of helpdesks use labels as a key part of their workflow

.Now there's a new way to get even more out of labels: color

Replace uniform gray labels with your own custom colors, and your agents instantly get :more information at a glance

You can pick from one of 16 predefined colors, or get the precise shade you like by entering .(a hex color value (we hope 16,777,216 possible colors are enough

To set this up, go to the **Labels** section for each type of content (e.g. **Admin > Tickets > Labels)**.
