## We have updated the design for ticket views in the helpdesk

([Product \(Agent\)](#) - [تعليقات \(.\)](#)) - Lara Proud - 2022-11-01

.We have updated the behavior and design of ticket lists in the helpdesk

In Table View we added the ability to preserve per queue, column width of the table and any fields you have applied. We have also added a gray background behind the ticket list to increase the contrast and enhance ticket visibility.

Additionally, we have added an open ticket state, which is signified by a blue colored ticket, as seen below. This change will apply to both **Table View** and **Card View** by adding a blue indicator to tickets you have open in a .tab

:In **Table View**, it will look like this

| ID  | Subject                                  | User                                     | Agent      | Last Reply |
