You can now download emails from a User's ticket

([Product \(Agent\)](#) - [تعليقات \(.\)](#)) - Lara Proud - 2022-09-13

You can now download emails by clicking on a User's email in the ticket thread and downloading it as a .eml file; we added this to make it easier to save specific messages or threads

.You can do this by clicking on the ☰ menu on the ticket and clicking **Download Email Source**

We have added this feature to enable you to share downloaded email files with colleagues more efficiently or to store them on your computer for future reference or protection if needed
