Integration with TFS online Under Review

- Marcin
- **Име на форума:** #Feature Request

We would like an integration with Visual Studio online so that way we can create/close of tickets in TFS and it creates/closes them in deskpro

I too would consider this product if this was provided

Desy

Yea, no TFS/TFS online (VSTS Online) is a deal breaker for us

Sergey

преди 6 години

We use a local deployment of TFS. It would not be bad to have integration with both versions of TFS and VSTS. Like many Marketplace add-ons

Would really love to see this, our clients raise issues in deskpro and we'd like deskpro to automatically push them to VSTS so we can work in VSTS. Any edits made in VSTS pushed to deskpro.
