Support for 3CX voice system Collecting Feedback

Any change for an integration of the 3CX phone systems? They already offer integrations für Zendesk, Freshdesk and Salesforce to create tickets für Answered/Unanswered calls (inbound and outbound). For example: <https://www.3cx.com/docs/zendesk-crm-integration/>

This is a big one for me, our company has just moved to 3CX but also wanting to get away from Zendesk. If this happens, choosing Deskpro will be a no brainer.
