

How can I add translations for the Welcome Message on the Portal?

Grace Howlett - 2019-12-19 - Коментари (0) - Portal Customization

If you need to support a multi-lingual Portal, you can't use the simple welcome message box in the portal editor.

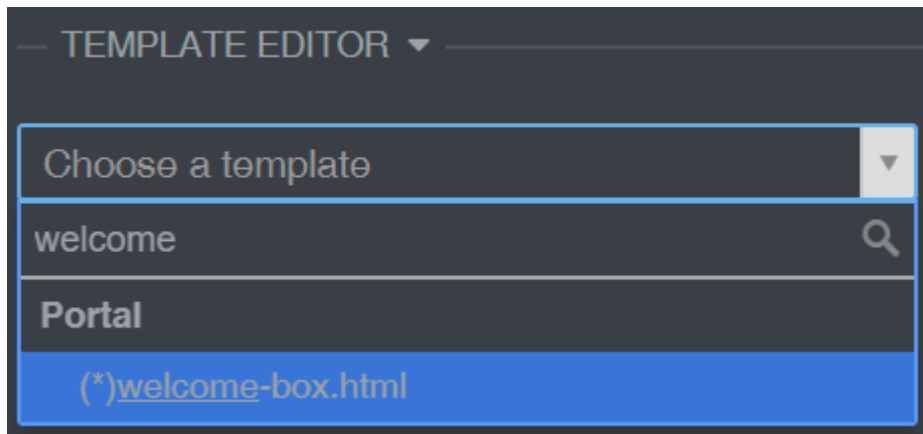

Instead, you can edit the **welcome_box.html** template in the portal editor to add different versions of a welcome message based on the language selected in the portal.

To do this:

1. Go to **Admin > User Interface > Portal > Template Editor**.

2. Search 'Welcome' and select the **welcome_box.html** template.

3. Edit the code appropriately and click 'Save'.

Here is an example of the code you could use within this template:

```
<div class="wrapper">
  <div class="column-full">
    <div class="welcome-block-wrapper">
      <div class="welcome-block-second-border">
        <div class="welcome-block">
          {% if app.user.language.sys_name == 'default' %} <h1>My Default
Title</h1>
          <p>My Default Content</p> {% elseif app.user.language.sys_name
== 'swedish' %} swedish content {% elseif app.user.language.sys_name ==
'german' %} <h1>My German Title</h1>
          <p>My German Content</p> {%endif%}
        </div>
      </div>
    </div>
  </div>
</div>
```

The section highlighted in bold is what controls the content based on the different languages you define.

This is how that would look in the template editor:

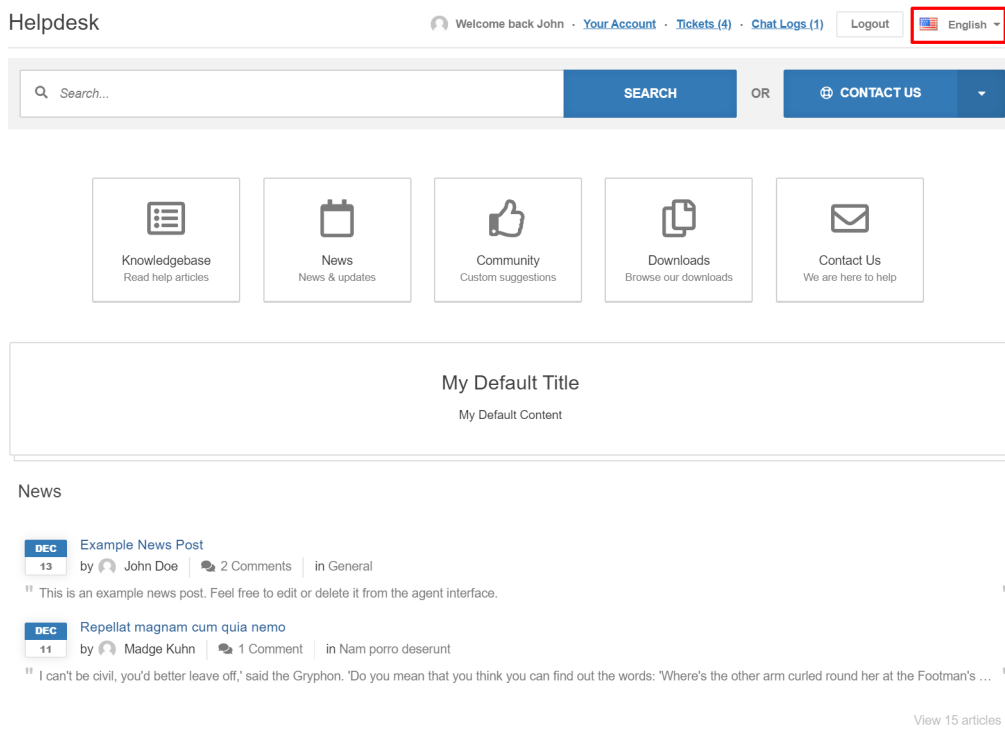

```
2 <div class="wrapper">
3   <div class="column-full">
4     <div class="welcome-block-wrapper">
5       <div class="welcome-block-second-border">
6         <div class="welcome-block">
7           {% if app.user.language.sys_name == 'default' %} <div>My Default Title</div>
8           <div>My Default Content</div> {% elseif app.user.language.sys_name == 'swedish' %} swedish content {% elseif app.user.language.sys_name == 'german' %} <div>My German Title</div>
9           <div>My German Content</div> {%endif %}
10        </div>
11      </div>
12    </div>
13  </div>
14
```

Remember that any languages you want to define here should also be installed as a helpdesk language in **Admin > Setup > Languages**, so it is selectable for your users on the portal.

4. Click 'Preview Changes' to test how that will appear on your portal within the editor, then 'Save Changes' when you are ready to make that change live on your portal.
