

## How can I make a department visible to agents only?

Simon Paulger - 2023-09-07 - Коментари (0) - Ticket Structure

Creating a Department that is only visible to Agents, that Users never see, can be done with the use of [Usergroups](#). To make a Department visible to agents only, go to **Admin > Ticket Structure > Departments**.

Either create a new Department with the **+ New** button, or select the Department you want to make Agent Only, and under the **Permissions** tab remove all usergroup permissions. Below is an example of an Agent Only Department called "HR Investigations".

## Edit: HR Investigations

**[User](#)** [Agent](#)

---

Usergroup permissions control which of your users can select a department when submit

Note that it is still possible for agents to change the department to one that a user would department regardless of user permissions. Usergroup permissions are therefore very m

| Usergroup Permissions | Full access              |
|-----------------------|--------------------------|
| 221B Solar Trial      | <input type="checkbox"/> |
| Contractors           | <input type="checkbox"/> |
| Everyone              | <input type="checkbox"/> |
| Internal Users        | <input type="checkbox"/> |
| Registered            | <input type="checkbox"/> |
| Support               | <input type="checkbox"/> |

This will stop users from seeing this Department when they create or edit a ticket on the Help Center.

However, if an Agent assigned a User's ticket to a hidden Department, the user could still see it from the Help Center.

### Ticket Properties

Edit

Department

HR Investigations

However, you can give the Department an Alias to stop the name from being seen by your end users. To do this, go to **Admin > Ticket Structure > Departments** and enable **Display an alias to end-users**, then enter an alternative name to be displayed to users.
