Can I change the text used on the Help Center outside of the Publish app content? Yes, you can change almost all of the user-facing text on the Help Center and in emails using the Deskpro phrases system.

To do this, go to **Admin** > **Configuration** > **Phrase Translation**. To the phrase you want to change, you can use the **Search box** on the page or **Ctrl-F** / **Cmd-F** keyboard shortcuts to search for the phrase on each page.
