DeskPRO Build #182 Released

2012-11-21 - Chris Padfield - Коментари (0) - Release Announcements

We are pleased to announce a new release of the DeskPRO helpdesk platform, build #182.

The following is an automatically generated list of changes in this release:

- When textarea auto-resizes, ensure scrollbar goscrollbottom doesnt get called if your not actually at the bottom. Prevents very long replies from overflowing and always causing scrollbar to go back down to the bottom when typing near the top.
- Add cloud onboarding to set custom domain, fix setting custom domain from settings page
- Fix route for cloud add agents from onboarding
- Only call the agent reply autosave system if the content has changed since the last save.
- Prevent JS error if upload finished when is already closed

If you are using the cloud version of DeskPRO, your account will have already been updated or will be updated within the next 24-48 hours.

If you are using DeskPRO download, you can update your installation from the admin interface.
