DeskPRO Build #358 Released

2014-08-11 - Chris Padfield - Коментари (0) - Release Announcements

We are pleased to announce a new release of the DeskPRO helpdesk platform, build #358.

The following is an automatically generated list of changes in this release:

- FIX Comment count at the top of articles in portal was incorrect
- FIX Editing templates removing phrase tags that it shouldnt
- FIX Missing error message when trying to add a cc that is already on on the ticket
- FIX Display order of choice options would not save
- FIX LDAP App: The SSL and StartTLS options were not being applied properly

This update has now been rolled out to all Cloud customers.

If you are using DeskPRO Download, you can update your installation from the admin interface.
