Export Triggers Data to a CSV file Collecting Feedback

- Nadia
- **Forum name:** #Feature Request

There should be a way to have one overall view of triggers data including the criteria and actions. This is very important as we have a large number of triggers defined and I usually need to locate the triggers where a certain agent is assigned so I can change the agent. If I can export all triggers in CSV format maybe then I can search and sort by a certain column.

Thank you,
