Prepaid tickets/time for users to use for support Collecting Feedback

- Tom Schoen
- **Forum name:** #Feature Request

We have contracts with a number of clients who get a perpaid ticket or time pack. They get like 10 tickets a month or 10 hours a month and pay whenever they go over that amount. It would be great if deskpro could integrate this in the billing system so that created tickets automatically substract the correct amount from the customer's and "pack".

For an MSP, this is an absolute necessity.
