

How do I set up an email account for outgoing messages only?

Alexandra Mead - 2023-09-15 - Comments (0) - Channels

Most email messages sent by Deskpro are linked to a particular ticket. However, some automatic emails do not relate to a specific ticket; for example, password reset links, welcome emails, and login alerts. The account used to send these non-ticket emails is called the default email account. You can pick which account this is from **Admin > Channels > Email > Settings**.

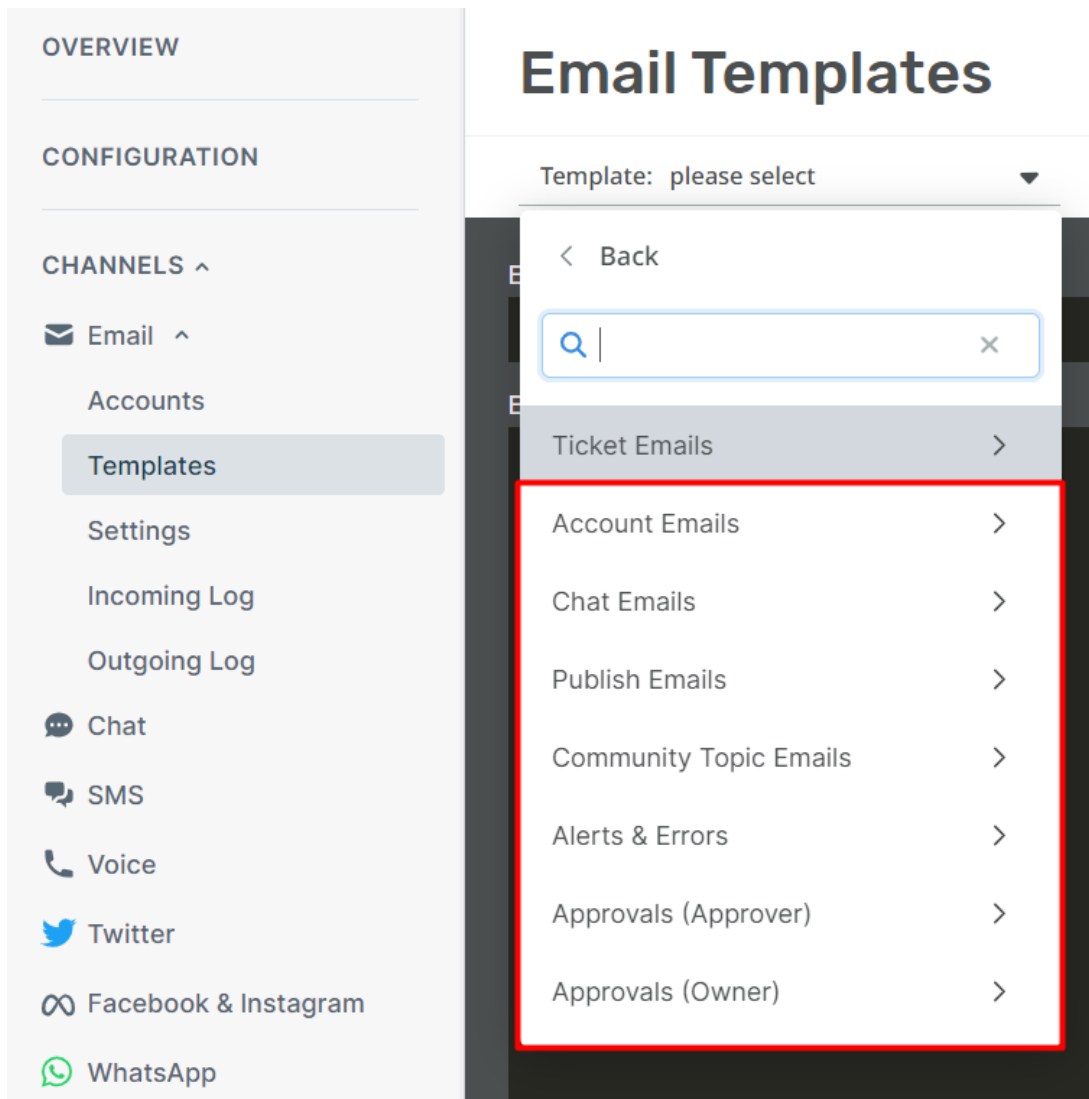

The screenshot shows the 'Outbound Email Settings' page in the Deskpro Admin interface. On the left is a navigation sidebar with 'CHANNELS' expanded to show 'Email', 'Accounts', 'Templates', 'Settings' (highlighted), 'Incoming Log', and 'Outgoing Log'. Below 'CHANNELS' are 'Chat', 'SMS', 'Voice', 'Twitter', 'Facebook & Instagram', 'WhatsApp', and 'Reviews'. At the bottom is 'AGENTS'. The main content area is titled 'Outbound Email Settings'. A red box highlights the 'Default email account' label. Below it, a text block explains that Deskpro sends non-ticket related emails and that this option defines which account to use. Below the text are 'Brands' (221B Energy, 221B Internal Support, Test brand) and a dropdown menu for 'Default email account' currently showing 'contact@221benergy.deskpro.com'.

You may prefer to use a "no-reply" account for non-ticket emails instead of an email account configured to accept tickets. That means that if a user replies to a password reset email, for example, their message will be discarded instead of converted into a ticket.

To set up a no-reply account:

1. Go to **Admin > Channels > Emails > Accounts** and create a new account, e.g. `noreply@yourcompany.com`.
2. Configure the settings.
3. Enable and save the account.
4. Go back to **Admin > Channels > Email > Settings** and select the new no-reply account as the default email account.

You may also wish to edit the user email templates that are sent from the no-reply address (i.e. all the user email templates except those under Ticket Emails) to add a message making it clear that any replies to this address will not be read. This can be edited under **Admin > Channels > Email > Templates**,

Additionally, if you want to automatically delete any tickets created via your noreply@ account, you can create a Trigger in **Admin > Business Rules > Triggers**.
