## Why are User replies on Resolved Tickets creating new tickets?

Sean Kerwin - 2023-09-13 - Comments (0) - CRM

## Question:

A user replied to a ticket that had been resolved. I'd expected their message to be added to the ticket thread, but instead, a new ticket was created. What's going on?

## **Answer:**

Check that the user did not reply from a different email address that is not associated with their account in Deskpro.

If they were using the same address, the user probably did not have permission to re-open a resolved ticket.

Under **Admin > CRM > Usergroups**, hover over the usergroup that the user belongs to and click the **Pencil** edit button.

Usergroups Beinging to a usergroup dotermines the actions a user can perform and what help Center content they can see.	• mig	
Q. Search Tilter		
Title	Type Description	Count ID
C Everyone	Built-in Every user including both guests and registered members.	0
Registered	Built-in All registered people in the system	0

Here you can check the settings for the Can re-open resolved tickets permission.

## Edit: Registered

id: 2

If none of the usergroups in your helpdesk grant permission to re-open resolved tickets, replies on resolved tickets may be rejected or accepted as a new ticket.
