

New Feature: Click-to-edit fields on tickets

2017-01-17 - Lauren Cumming - Comments (0) - Product

We are always looking for ways to improve your experience with Deskpro in terms of making it more user-friendly. This is why we have introduced 'Click-to-edit' fields on tickets. You can now simply click on any field in your ticket properties box, such as Workflow or Category, and edit it straight away. Click on a field, edit it and press save at the bottom to make a change. You don't have to click on the gear to make fields editable anymore which is a great time saver and makes this process a lot more effortless.

The screenshot displays the 'PROPERTIES' tab of a ticket in Deskpro. At the top, there are navigation tabs: 'PROPERTIES' (active), 'LINKED TICKETS (3)', 'TASKS (0)', and 'SLAS'. Below these are three main sections: 'Agent' (Unassign) with a dropdown menu showing 'John Doe', 'Team' (None) with a dropdown menu, and 'Followers' (Add Me) with a '+ Add a follower' button. Below these are three rows of labels: 'Labels: Add a label', 'Language: English', and 'Which option applies?'. A section titled 'What date is this for?' is also visible. At the bottom of the properties box, there is a section for 'Please add your recommendations:'. Below the properties box is a toolbar with icons for 'Lock', 'Merge', 'Macros', 'Remove', and 'Actions'. At the bottom of the screenshot is the 'REPLY NOTE' section, which includes a rich text editor with buttons for 'Attach', 'Snippets', 'Bold', 'Italic', 'Underline', 'List', 'Link', 'Image', 'Code', and 'Close'.
