

## Download ticket results as CSV

Christopher Nadeau - 2023-08-17 - Sylwadau (0) - Agent

### **Download ticket queue/list results**

The easiest way to download tickets is by running a queue or list from the agent interface. When results load, switch to the table view and then click on the CSV button on the bottom left.

### Download tables generated from a report

You can create a stat (or use a built-in stat) to generate a *table* report. From here, you may download the results as CSV.

Refer to the full reporting guide for information on using reports: [Using the Stat Builder](#)

Tickets opened in the past 24 hours ▾

Reset order | Showing 1 to 1 of 1 entries

### Using the Deskpro API

If no other option provides the flexibility you need, then you can use the Deskpro API. Refer to the developer guide here: [About the API](#)
