DeskPRO Build #275 Released

2013-07-17 - Chris Padfield - Sylwadau (0) - Release Announcements

We are pleased to announce a new release of the DeskPRO helpdesk platform, build #275.

The following is an automatically generated list of changes in this release:

- NEW Added Romanian language
- FIX Filter controls on admin sendmail queue viewer
- FIX Fix to some dismissed alerts coming back.
- FIX Rating links sent to users via email would become invalid if you changed the ref format
- FIX Fix PHP error when using API to submit new ticket with a new user when specifying a new organisation
- FIX Possible PHP notices in some email processing to do with detecting TAC codes
- FIX Image resize on some Windows servers using GD could fail with "tmp format is not supported"

If you are using the cloud version of DeskPRO, your account will have already been updated or will be updated within the next 24-48 hours.

If you are using DeskPRO download, you can update your installation from the admin interface.
