Ability to view each ticket that used a particular snippet in "snippet reporting" Finished

- Jason
- **Navn på forum:** #Feature Request

Would it be possible to add links to the snippet reporting feature so we can easily see the tickets where the snippets were used?

The following report should allow you to do this :)  
DISPLAY TABLE SELECT  
OBJ\_LANG(ticket\_object\_use\_logs.snippet.category.id, 'text\_snippet\_categories') AS 'Snippet Category', OBJ\_LANG(ticket\_object\_use\_logs.snippet.id, 'text\_snippets') AS 'Snippet', COUNT()  
AS 'Uses' FROM ticket\_object\_use\_logs WHERE ticket\_object\_use\_logs.snippet.id <> NULL  
AND ticket\_object\_use\_logs.date\_created = %1:DATE\_GROUP% SPLIT BY  
ticket\_object\_use\_logs.snippet.id GROUP BY ticket\_object\_use\_logs.ticket.id ORDER BY  
COUNT() DESC
