API

Limit on total number of tickets returned from API Collecting Feedback

- Mikkel Ricky
- Navn på forum: #Bug Report

We're using the Deskpro API to fetch tickets based on a custom ticket field, but it seems that the number of tickets returned from the API is limited to 1000 (we have 1116 tickets where "custom field 28" = 403):

'>

```
> curl --silent --header 'Authorization: key ...'
'https://....deskpro.com/api/v2/tickets?ticket_field.28=403' | jq '.meta.pagination'
{
   "total": 1000,
   "count": 10,
   "per_page": 10,
   "current_page": 1,
   "total_pages": 100
}
```

It seems that whenever we apply a filter, e.g. `status=awaiting_agent`, we get at most 1000 results.

Is this a bug or a feature in the Deskpro API? Is this limit documented anywhere?
Best regards,
Mikkel
