New Tickets Should Have Notes Tab Finished

- Kurt
- **Navn på forum:** #Feature Request

When creating a New Ticket it would be very advantageous to be able to log the call in the Notes tab.

 Currently the call flow for inbound calls is a bit clunky without having this feature. Reps. need to keep notes in Notepad and then paste them in afterwards.

Absolutely necessary for phone tickets! WE just want to log information for the agent and do NOT send the customer a reply. So we NEED the notes tab.
