Restrict the Agent and Agent Teams that can be selected in the ticket assignment drop-down menus Collecting Feedback

Dear Deskpro,

We'd like to be able to restrict what agents can select in these drop-downs:

The screenshot shows a ticket assignment interface with two tabs: 'PROPERTIES' and 'TASKS (0)'. Below the tabs, there are two dropdown menus. The first dropdown is labeled 'Agent · Unassign' and shows a selection of '(200) Ahmad Sahrizal'. The second dropdown is labeled 'Team · Assign to My Team · Unassign' and shows a selection of 'L1 - HAI DJPb'.

For example:

Agent A is included in Team 1 (consist of A and B) and Team 2 (A and C), so A have ability to assign ticket only to his team (Team 1 and Team 2)

and to Agent Member in his team (A, B, C).

In additions, I think it will be nice if Deskpro can separate Agent based on brand. so if Agent Layer 1/First Line Agent that receives ticket first from user, they can escalate ticket only to Agent that belong to his/her brand.

When assigning a ticket to an agent, we want to be able to set it so that the agent can only see team members or agents who have access to that department. Thank you!

We would like to have the option of creating multiple Agents lists/groups for other Agents to choose from. For example, Agents in Group 1 will only have the option of assigning tickets to Agents in Group 2, etc. They would not be able to see any other Agent not in that group. Thank you.
