Can I change the text used on the Help Center outside of the Publish app content?

Yes, you can change almost all of the user-facing text on the Help Center and in emails using the Deskpro phrases system.

To do this, go to **Admin > Configuration > Phrase Translation**. To the phrase you want to change, you can use the **Search box** on the page or **Ctrl-F / Cmd-F** keyboard shortcuts to search for the phrase on each page.

The screenshot shows the 'Phrase Translation' page in the Deskpro admin interface. The page title is 'Phrase Translation' and it includes a 'Help' button. Below the title, there is a search box and a 'Filter' button. A red arrow points to the search box. The page displays a table of phrases under the heading 'Your Objects'. The table has columns for 'Phrase', 'English', and 'Customized?'. The table lists various phrases like 'obj_ticketfilter.10_title' with their corresponding English translations and a checkmark in the 'Customized?' column. The table is titled 'Ticket Queues and Sets (27)'. At the bottom of the table, there is a 'Rows per page' selector set to 100, and a total count of 343 items (332 Unique Items).

obj_ticketfilter.19_title	All New Tickets	✓

In the **Text box**, enter your changed version of the text and click **Save**. If you have more than one language installed on the helpdesk, you will need to define the change for each language.
