Setting Up an Escalation for Data Retention in Deskpro

Kim - 2024-08-01 - Kommentarer (0) - Business Rules

Escalations in Deskpro are a useful tool for managing data retention. You can configure tickets to be archived or deleted after a specific period, helping you comply with data retention policies.

Step-by-Step Guide:

### Navigate to Escalations:

Go to Admin > Business Rules > Escalations > + New

### **Select the Event:**

- Choose the event "The ticket has been resolved for..."
- Set the duration (weeks or years) to determine how long the ticket will remain before being deleted.

#### 2 Event

The ticket has been resolved for	•	2		years	•	
----------------------------------	---	---	--	-------	---	--

# **Configure Criteria (Optional):**

Criteria can be set to customize the escalation. For instance, you might choose to
escalate tickets that have a certain label. In the example, you can see we're
selecting tickets that have the label 'Contains contact info.'

3 Criter	ia			
Criteria that	t must match for the escalation	to apply to a ticket.		
When	the following conditions are r	net:		
	Labels	▼ contains	Contains contact info ×	•
And	any of the following condition	is are met:		
	Select	▼ Select	~	

# **Define Actions:**

• Specify the action to be taken on the ticket: either archive or delete.

• You can also define the reason for the action, such as "Data retention."

4 Actions		
These actions will apply when all of the criteria pass.		
Then the following actions will run		
R Delete ticket	Define reason for delete      Reason     Data retention	+
