DeskPRO Build #54 Released

2012-07-17 - Chris Padfield - [Kommentarer (0)](#) - [Deskpro Releases](#)

We are pleased to announce a new release of the DeskPRO helpdesk platform, build #54.

The following is an automatically generated list of changes in this release:

- Small changes to purchased dp4 license decoding
- Skip importing of custom fields of type 'custom', there is no custom PHP field like it
- Stick access code into a link element too
- Move reply codes to very bottom of email and make them light gray instead of white-on-white. Some clients seem to strip out invisible text.
- Say when lic expired
- Correct license URL for when its expired, used to be admin/license but now /billing
- Improve omnisearch a bit by reducing 'flashing' of results as you type

If you are using the cloud version of DeskPRO, your account will have already been updated or will be updated within the next 24-48 hours.

If you are using DeskPRO download, you can update your installation from the admin interface.
