DeskPRO for iPhone and Android

This initial version of the DeskPRO app includes:

- Access your ticket filters to get lists of tickets
- View individual tickets, to see the ticket messages, notes, and properties
- · Reply to tickets
- Change ticket properties like department, status, or agent
- Ticket notifications shows you real time ticket updates
- View inline images and download ticket attachments

Very much required, as there is no way to reach out to unlisted ticket.

Ben Henley
