"can use tickets" in "everyone" usergroup keeps getting unchecked Finished

- Amanda
- **Forename:** #Bug Report

The "can use tickets" slider in "everyone" usergroup keeps getting unchecked! No matter how many times I change the slider to green and click save, it keeps becoming unchecked. The offending slider is located at: CRM > Usergroups > Everyone > Permissions > Tickets >; "can use tickets"

Hi Amanda, Is this still an issue? We believe there is an issue when a download category is created. It will be fixed in the next build. Chris
