Chat Widget Pop-up Delay Option Finished

- RR Richard Royce
- **Forenname:** #Feature Request

What we would like ideally is for the standard 'Help?' button to display for several seconds after the page as loaded, then for the chat widget to pop up along with a welcome message from the agent such as "How can I help?". You can view an example here: https://www.solopress.com/.

 Ideally we would have the ability to change the delay length to try different options.
