Handle re-sizing Guide content better for different screen sizes Finished

- DT Dave Topan
- **Forename:** #Feature Request

On the Portal, the width of the Guides doesn't adjust depending on the screen size. This means that text is still shortened and less legible, even though there is space to be used.

The screenshot shows a Help Center interface. On the left is a navigation sidebar with categories: 'IT Disaster Recovery', 'APPLICATION AND ROLE B...', 'FILE RESTORE', 'POLICIES', and 'SYSTEM SPECIFIC RECOVER...'. The 'POLICIES' section is expanded to show 'Backup Policy'. The main content area displays the 'Backup Policy' page, which includes a title, publication/updated dates, a section header 'I. Purpose and Scope', a paragraph stating the purpose of the policy, a bulleted list of three points, and a concluding sentence: 'This policy applies to all computers, laptops, tablets and desktops owned by...'. On the right side of the page, there is a 'CONTENTS' table of contents with two items: 'I. Purpose and Sco...' and 'II. Backup and Rec...'. The 'CONTENTS' header and the first item are highlighted with a yellow box.

Thanks for this suggestion, it has been implemented on Help Center. When you adjust the screen while looking at a Guide, the content will now adjust to fit the width of the browser to ensure it can still be read. The table of contents on the left-hand side will be stacked above the guide content and collapsed into a menu so it can still be accessed easily if you need to jump somewhere else in the guide.
