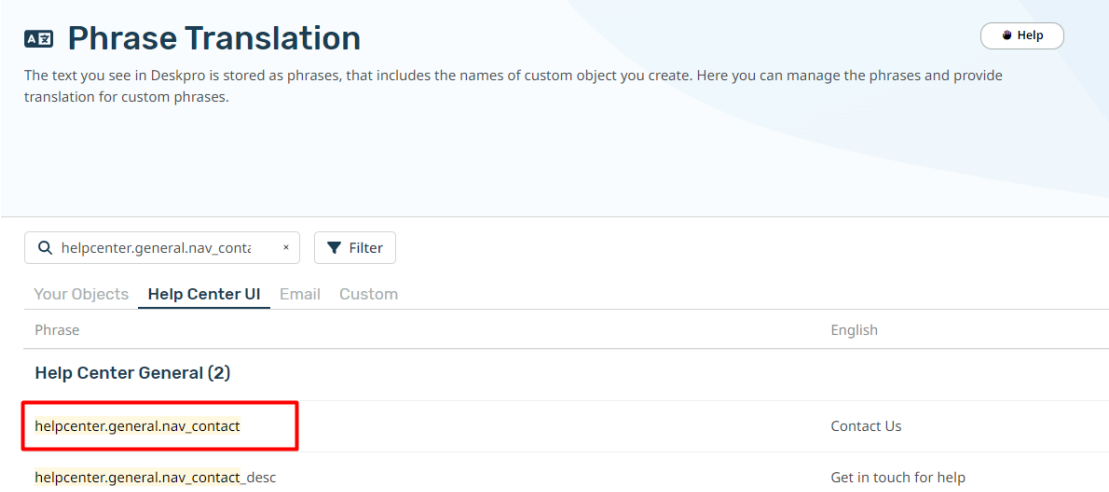
Change the name of the Contact Us tab

Thomas Rolfe - 2023-09-13 - Kommentare (0) - Configuration

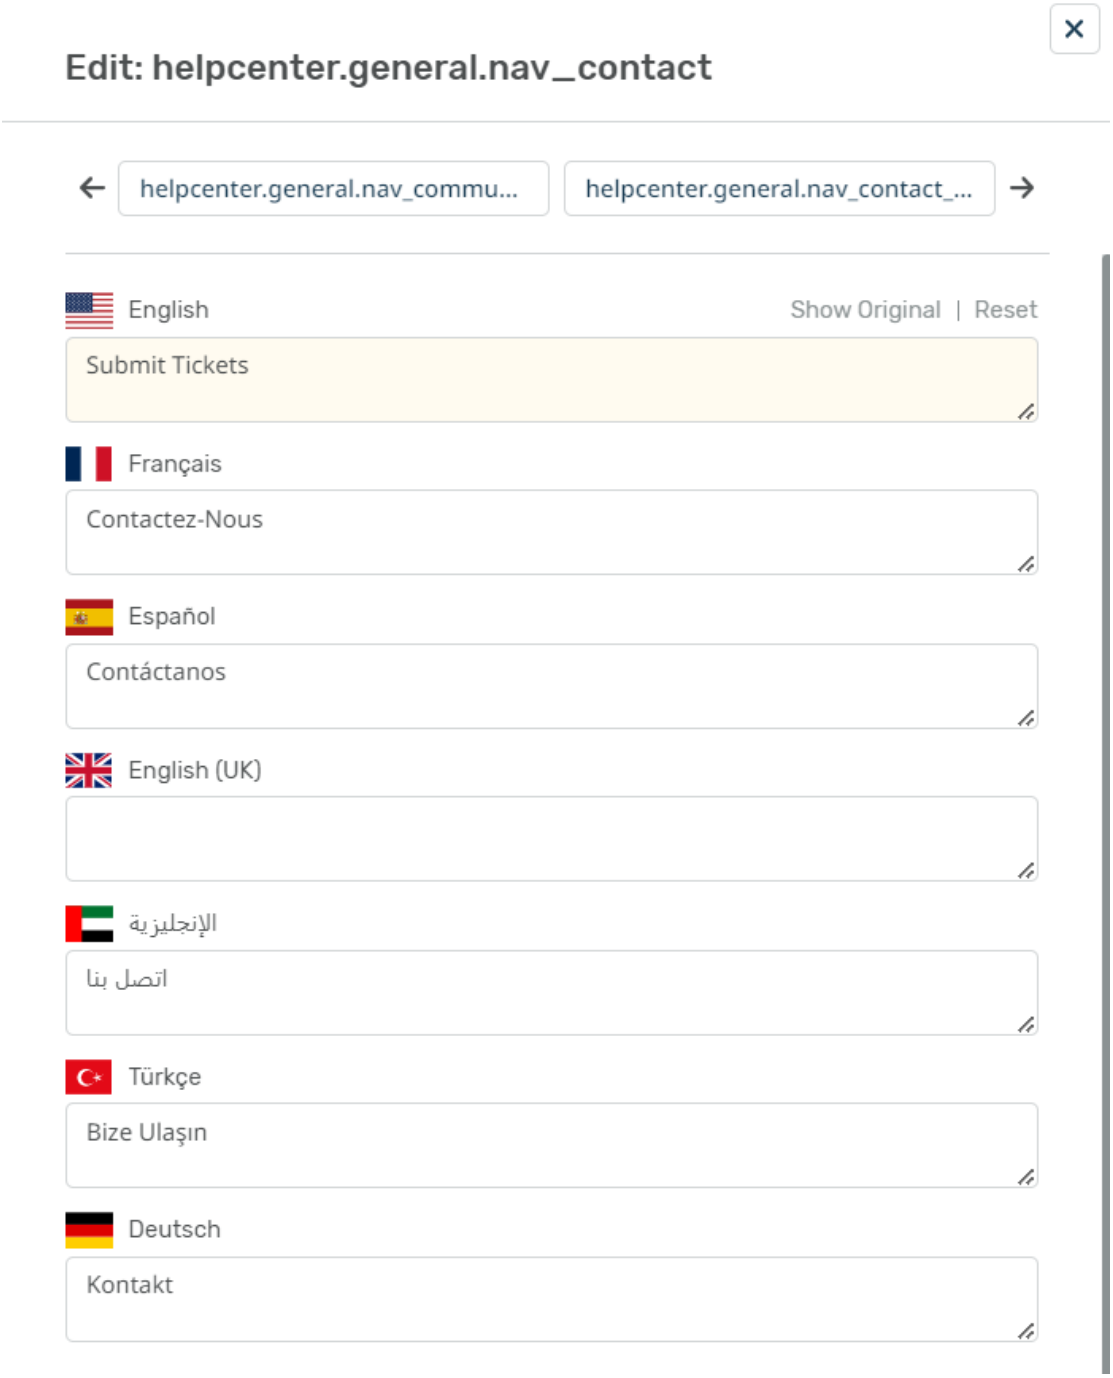
You can customize the text on the Help Center **Contact Us** button where users submit tickets. For instance, if you'd like to rename it from "Contact Us" to "Submit Tickets".

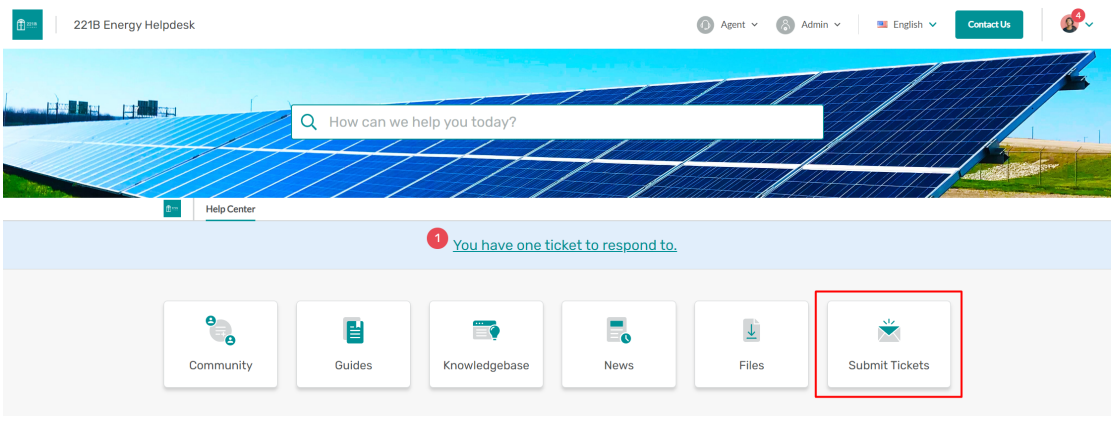
Go to **Admin > Configuration > Phrase Translation**. Click the Help Center UI tab and search for helpcenter.general.nav_contact.



Click the highlighted row and edit the text for your language.

Click **Save** at the bottom of the page.





Now when you go to the Help Center, you will see your custom button name.
