How do I install the chat widget in Joomla?

Lauren Cumming - 2023-08-16 - [Kommentare \(0\)](#) - [Using Deskpro](#)

1. Login to your Joomla account as an administrator.
2. Select "**Extensions**" > "**Templates**" > "**Styles**" from the dropdown menu at the top of the page.

3. Select your needed template e.g pick "**Default for all pages**" template, and click on its template name.

4. Copy the chat widget code from Deskpro under **Admin** > **Chat** > **Site Widget & Chat**.

Add widget & chat to your site

Embed code

```
<!--DESKPRO_WIDGET_LOADER::BEGIN--><script type="text/javascript">window.DESKPRO_WID
```

COPY

Manually installing the widget

Install widget in a CMS

5. From your template select "**index.php**" from the file tree and find closing `</head>` tag. Paste the chat widget code here.

The screenshot shows a CMS interface for editing a template. At the top, there's a header "Templates: Customise" with buttons for "Save", "Save & Close", "Copy Template", "Template Preview", and "Manage Folders". Below this are tabs for "Editor", "Create Overrides", and "Template Description". A banner indicates "Editing file '/index.php' in template 'protostar'".

On the left is a file tree with folders: `css`, `html`, `images`, `img`, `js`, `language`, `less`. Files listed include `component.php`, `error.php`, `index.php`, `offline.php`, `templateDetails.xml`, `template_preview.png`, and `temolate thumbnail.png`. A blue arrow points from `index.php` in the tree to the code editor.

The code editor shows PHP code with line numbers 128-147. A blue arrow points to line 131, which contains the closing `</head>` tag. The code includes a `<body>` tag with various attributes and a `<div class="body">` containing a `<div class="header">`.

At the top right of the code editor, a tooltip says "Press F10 to toggle Full Screen editing."
