

DeskPRO Build #231 Released

2013-01-30 - Chris Padfield - Kommentare (0) - Release Announcements

We are pleased to announce a new release of the DeskPRO helpdesk platform, build #231.

The following is an automatically generated list of changes in this release:

- Update MooTools from 1.4.2 to 1.4.5 for a few bugfixes in utils
- Fix possible JS error on updating chat counters
- Fix possible JS error on opening massactions after original was destroyed
- Prevent possible dupe declaration of Strings in rare cases where compiled file is included first
- Fix trigger description for specific assigned agent
- Fix possible warning when trying to loop over header

If you are using the cloud version of DeskPRO, your account will have already been updated or will be updated within the next 24-48 hours.

If you are using DeskPRO download, you can update your installation from the admin interface.
