

DeskPRO Build #405 Released

2015-05-29 - Chris Padfield - Kommentare (0) - Release Announcements

We are pleased to announce a new release of the DeskPRO helpdesk platform, build #405.

The following is an automatically generated list of changes in this release:

- NEW 'via_agent' flag on people API call to send byagent welcome email instead of normal welcome email
- FIX Agent: New tickets could be created with default values on fields that are not visible for a given layout
- FIX Agent: Custom choice fields were broken on advanced search form
- FIX Agent: Some select fields might not be rendered as select2s depending on their order in the layout
- FIX Agent: Possible validation errors when applying macros
- FIX WebHook call when using GET/DELETE would attempt to send body

This update has been rolled out to all Cloud customers.

If you are using DeskPRO On-Premise, you can update your installation from the admin interface.
