

DeskPRO Build #66 Released

2012-07-25 - Chris Padfield - Kommentare (0) - Release Announcements

We are pleased to announce a new release of the DeskPRO helpdesk platform, build #66.

The following is an automatically generated list of changes in this release:

- Fix using incomplete lang in reports interface
- Remove dead code
- Report onapp status
- Remove some cleaning rules that can result in removing entire blocks of tags
- Fixes to waiting time filters and real-time updates
- Fix rewrite check failing if server cant read itself
- Fix problem with first reply showing with html entities
- Update sub-grouping numbers when tickets are updated

If you are using the cloud version of DeskPRO, your account will have already been updated or will be updated within the next 24-48 hours.

If you are using DeskPRO download, you can update your installation from the admin interface.
