

DeskPRO Build #72 Released

2012-07-26 - Chris Padfield - Kommentare (0) - Release Announcements

We are pleased to announce a new release of the DeskPRO helpdesk platform, build #72.

The following is an automatically generated list of changes in this release:

- Rawify a bunch of phrase tags that use a phrase_part convention for HTML
- Always log output even in quiet mode
- Capture upgrade command output so it can be logged
- Fix another off-by-x key causing bad charts

If you are using the cloud version of DeskPRO, your account will have already been updated or will be updated within the next 24-48 hours.

If you are using DeskPRO download, you can update your installation from the admin interface.
