

DeskPRO Build #98 Released

2012-08-16 - Chris Padfield - Kommentare (0) - Release Announcements

We are pleased to announce a new release of the DeskPRO helpdesk platform, build #98.

The following is an automatically generated list of changes in this release:

- Fix importing ticket messages sometimes screwing up encoding
- Add support for favoriting reports
- User proper secure.gravatar.com domain for serving https
- 100 means unlimited
- Reset some css on elements that might be set by an external stylesheet and might cause layout to mess up
- Add support for built-in report management and report deletion.
- Fix serving http content from https
- Add couple more log lines and fix always thinking inbox is empty
- Upgrade command needs to run from new build dir
- Beginning stages of work on the report builder interface and management operations

If you are using the cloud version of DeskPRO, your account will have already been updated or will be updated within the next 24-48 hours.

If you are using DeskPRO download, you can update your installation from the admin interface.
