## Extension of Authentication Options (5.2)

2017-03-13 - Lauren Cumming - [Kommentare \(0\)](#) - [Product](#)

We have extended the authentication options available so that you can now:

- add agents/users to multiple usergroups
- add agents to teams
- add labels to agents
- add labels from value
- make an agent an admin

You can also now add multiple actions at a time and add filters e.g Add to agent permission group 'only if X'.

The screenshot shows the 'Login Actions' configuration page. On the left, the title 'Login Actions' is visible. To the right, there is a section titled 'Add Action' with a list of five action items, each consisting of a dropdown menu and a checkbox labeled 'only if x'. The first four items are 'Add to agent permission group'. The fifth item is 'Add to agent permission group' with a blue checkmark next to it. A dropdown menu is open for the fifth item, showing the following options: 'Add to agent permission group' (checked), 'Add to agent team', 'Add to usergroup', 'Add label', 'Add label from value', and 'Make agent an admin'. At the bottom of the page, there is a green button labeled 'Call App' and a grey button labeled '← C'.
