Language sync

2019-01-09 - Emily Booth - Kommentare (0) - Product

Included in <u>Deskpro 2019.1</u> is the release of the latest update to <u>language</u> feature on Deskpro. This update will now allow your admins to easily and quickly update your installed language packs.

This is done very easily with only a couple of clicks by heading to Setup > Languages and 'Settings & Tools' at the bottom of this page. You will see our new addition at the bottom of the page with a simple drop-down box to select the language that you wish to update or simply update all installed languages, and then press the button 'Download latest language'.

ų.	Q Search		
	 Admin Dashboard Setup 	*	Languages
	ゆ Settings デ Automatic Updater		Language Settings
₽ ₽	 Rate Limiting Email Rate Limiting CAPTCHA Settings 		Automatically install new languages New language translations are sometimes added with new Designo updates. When this option is enabled, new languages will be automatically installed and enabled on your helpdesk.
A	Languages Reset Helpdesk		Auto-detect language on emails from new users
S	Agents	v v	Sae
al	Emails 촙 CRM	v v	Mass update ticket language
٥	User Interface		Update all (no lunguage) + tskets
\$	de Apps ⊘ Tasks		and set the language to English +
٢	Server		Mass-update lickets now
	4) Dev		Mass update user language choice Update al (no language) users and set their language to English
			Mass-update users now
			Download latest language Download tatest language for (all languages) • Download tatest language for (all languages) • Download tatest language Reset phrases

This will be especially useful for anyone currently contributing to the languages packs, but everyone who is using an installed language pack can also visit this page to check on any updates.
