New Chat Widget colors available

2017-05-30 - Zara Marchesi - [Kommentare \(0\)](#) - [Product](#)

You can now set colors for the Chat Widget itself, allowing you to customize this feature even more!

How do I set the color?

Simply go into Admin > Chat > Site Widget & Chat, and customize your colors!

The screenshot displays the 'Site Widget & Chat' configuration interface. On the left, the 'Button settings' section is expanded, showing options for 'Label' (set to 'Click for help'), 'Size' (set to 'Medium'), and 'Colors'. The 'Colors' section includes a 'Background color' picker with a color wheel and a text input showing the hex code '#e60300'. Below the color picker are options for 'Column' and 'Left' layouts. The 'Chat settings' and 'Proactive chat settings' sections are also visible. On the right, a live preview of the chat widget is shown. The preview includes a 'Google' logo, a 'Flexforce' header, and a chat history with messages like 'Chat started', 'Chat assigned to Andrew James', 'Sample question', and 'Sample answer'. A 'Click for help' button is visible in the bottom right corner of the preview. Arrows point from the 'Background color' picker in the settings to the 'Click for help' button in the preview, indicating that the selected color is applied to the button.
