Please add this!

Tommy Jackson

πριν από 11 χρόνια

Much needed!!!

H Hann

πριν από 11 χρόνια

definitely!

Schat.net

πριν από 11 χρόνια

this would be cool Like what was in version 3

Ben Goldberg

πριν από 11 χρόνια

This would be great. Sometimes international articles support and technical tips are appropriate for staff, but not the clients.

Brian Polackoff

πριν από 10 χρόνια

+ 1 for this. Thanks!

James Warner

You can already do this in the way you want I think - by assigning your agents to a usergroup - then just set the permissions on a new category for that usergroup only!

Jason Voice

πριν από 10 χρόνια

We do this by simply adding unpublished FAQ's to a category with no permissions, and agents view them through the publish section of the agent interface. Jame's way above will

give you the full user front end view too.

Ben Henley

πριν από 10 χρόνια

As James said, you can set this up by creating an agents-only usergroup - I've written a detailed how-to article:

<https://support.deskpro.com/kb/articles/261-can-i-have-internal-knowledgebase-articles-for-my-agents-only>

Tommy Jackson

User group works, but we would really like to be able to have both agent and user KBs in same category, so if the issue was printers, agents could see all in one place.

Ben Henley

Tommy, what you could do is use a subcategory for the agent-only articles, then restrict access to the subcategory. When your agents browse the category they would see something like this:

<https://support.deskpro.com/file.php/153386ADATGXBWYZDQSGM0/kb-agentonly-subcat.png>
