

How do I remove the ability for users to change their password?

Christopher Nadeau - 2023-08-31 - [Σχόλια \(0\)](#) - [CRM](#)

Option 1: Disable Deskpro auth

If you are using an external auth provider such as Active Directory or SAML, then you may wish to totally disable the built-in Deskpro auth (which will also remove the password reset from the Help Center).

You can do this from **Admin > CRM > Auth & SSO**, and then toggle off the “Deskpro” option.

The screenshot shows the Deskpro Admin interface. The left sidebar has a navigation menu with 'CRM' expanded, and 'User Auth & SSO' is selected. The main content area is titled 'User Authentication & SSO'. It shows a 'Next Sync' date of 'Aug 2, 2023, 2:00:00 AM'. Below this, the 'Deskpro' toggle switch is turned off, with a warning message: 'Disabling Deskpro User Management, will mean agents cannot'. There are buttons for 'Manage', '23' users, and 'ID: 1'. Below this, the 'Active Directory Authentication' section is visible with its toggle switch turned on. It has a 'Manage' button, '0' users, 'ID: 4', and a 'Sync' button.

Option 2: Edit the templates to hide the option

If you want to keep Deskpro auth enabled but still want to disable the ability for users to reset their password, you need to modify the Helpcenter templates. Read more about editing templates in the admin guide: [Editing Help Center Templates](#).

From the template editor, find the template **Portal > User/profile-sidebar.html**. Find the HTML block that adds a link to the password page and remove it.

```
9         </li>
10     <li class="dp-po-account-sidebar-item">
11         <a href="{{ path('portal_user_profile_password') }}" class="dp-po-account-sidebar-item">
12             
14             Your password <i class="dp-po-icon fal fa-angle-right"></i>
15         </a>
16     </li>
17 </li class="dp-po-account-sidebar-item">
```
