## Why are User replies on Resolved Tickets creating new tickets?

Sean Kerwin - 2023-09-13 -  $\Sigma \chi \acute{o} \lambda \iota \alpha (0)$  - CRM

## Question:

A user replied to a ticket that had been resolved. I'd expected their message to be added to the ticket thread, but instead, a new ticket was created. What's going on?

## Answer:

Check that the user did not reply from a different email address that is not associated with their account in Deskpro.

If they were using the same address, the user probably did not have permission to re-open a resolved ticket.

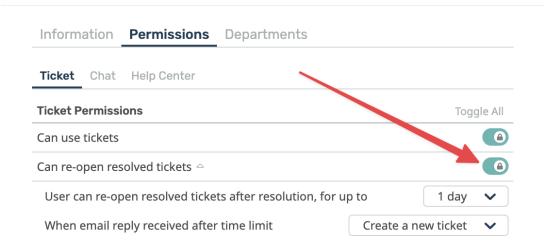

Under Admin > CRM > Usergroups, hover over the usergroup that the user belongs to and click the Pencil edit button.

Here you can check the settings for the  ${\bf Can}\ {\bf re}\text{-}{\bf open}\ {\bf resolved}\ {\bf tickets}$  permission.

**Edit: Registered** 

If none of the usergroups in your helpdesk grant permission to re-open resolved tickets, replies on resolved tickets may be rejected or accepted as a new ticket.
