More filter options for text box custom fields **Collecting Feedback**

- AS Ahmad Sahrizal
- **Forum name:** #Feature Request

If we create a custom field with field type Single-line Text Box or Multi-line Text Box.

Field Type	<input type="text" value="Single-line Text Box"/>
Enabled	<input type="checkbox"/> Enable this field
Title *	<input type="text" value="Detail Topik"/>
Alias	<input type="text" value="detail-topik"/>

Field Type	Multi-line Text Box
Enabled	<input type="checkbox"/> Enable this field
Title *	Summary Permintaan
Alias	summary-permintaan
Description	Ringkasan permintaan dari user

The content of this field is free text, just like the content of **Subject** field.

When we create a Filter, for **Subject** field there is four option: **contains**, **does not contain**, **is**, **is not**

The screenshot shows a 'New Filter' dialog box. The title is 'custom field filter'. Under 'Criteria', there is a list of active criteria. The first criterion is 'Subject' with a dropdown menu open showing four options: 'contains', 'does not contain', 'is', and 'is not'. The 'does not contain' option is currently selected. There is a 'Save' button at the bottom.

But, for a custom field with type is Single-line Text Box or Multi-line Text Box, we just have two options: **is** and **is not**.

The screenshot shows a 'New Filter' dialog box. The title is 'custom field filter'. Under 'Criteria', there are two criteria. The first is 'Subject' with a dropdown menu open showing 'contains' and 'password'. The second is 'Detail Topik' with a dropdown menu open showing 'is' and 'is not'. There is a 'Save' button at the bottom.

Could we add the option: **contains** and **does not contain** when we make a filter using a custom field with type: single-line and multi-line text box.
